

CXGF24/24/8

WASHING FILLING AND CAPPING 3 IN 1 MACHINE

PURE WATER THREE IN ONE UNIT

Technical parameters of the non-carbonated beverage production line

Uses: Suitable for plastic bottles, PET bottle filling mineral water, pure water

Main Technical Parameter:

Mode	CXGF24/24/8
Red bottle the first few	24
Filling the first few	24
Capping heads	8
Production capacity	12000Bottle/h
Power of main motor (KW)	4kw
Filling in the form	Gravity filling
Vacuum degree in Cylinder	-0.005~0.01Mpa
	Over load protect

CXGF24/24/8

WASHING FILLING AND CAPPING 3 IN 1 MACHINE

Automatic Washing Filling and Capping Three-in-one machine CXGF series

Feature:

The machine is mainly used in the beverage filling operations. The three functions of bottle wash, fill and seal are composed in one body of the machine. The whole process is automatic. The machine is used in filling juices, mineral water and purified water in bottles made of polyester and plastics.

The machine can also be used in hot filling if being installed with temperature controlling device. The handle of the machine can be freely and conveniently turned to adjust the machine to fill various types of bottles. The filling operation is faster and more stable because the micro pressure filling operation of the new type is adopted. There the output and benefit of the machine is higher than the machines of the same specifications.

The advanced OMRON programmed controller (PLC) is adopted to control the machine to run automatically while a transducer is used in the bottle-entering chains to adjust speeds and coordinated with the transducer of the main machine to make the operations of moving bottles forward steadily and reliably.

It is convenient to operate with higher automation because every part of the machine is inspected to run with photo electricity. On the bases, the filling parts of the machine can be changed into filling methods of lower vacuum.

The filling category of lower vacuum (Z type machine) is applicable in glass bottles, filling alcohol, soy and such like materials. The aluminum theft proof cap and plastic cap can be adopted. The machine is an idea-preferred equipment for beverage makers.

WASHING FILLING AND CAPPING 3 IN 1 MACHINE

Automatic Washing Filling and Capping Three-in-one machine CXGF series

Specifications

- 1.best service and low price
- 2.unique design
- 3.complete functions
- 4.convenient in operation

water filling machine

automatic drinking water filling and capping machine

(1) This bottling machine is mainly used for washing, filling and capping PET bottle which can fill non- carbonated drinks such as mineral water, pure water, wine and so on.

(2) Bottle washing, filling and capping are achieved in one machine.

(3) The contact time is shorten between material and the outside. And improved the health conditions, production capacity and economic benefits.

(4) CGF series bottling machine adopts hanging type conveying-bottle structure to make changing bottle mold more convenient, faster and more laborsaving.

(5) The main machine adopts advanced PLC control technology. The key electric elements adopt Mitsubishi, Omron, Siemens, etc international famous products.

(6) The washing filling line has features of unique design, new style, complete functions, multipurpose, convenient in operation, beautiful construction, high automaticity. The Washing Filling Machine is the best filling equipment in China.
